## **Clinical Care Guidelines - Clot Connect**

What is high blood pressure? Blood pressure refers to how hard blood pushes against the artery walls when your heart beats. A certain amount of pressure is necessary for blood to move around your body, but too much pressure can cause serious problems.

## **Chronic high blood pressure in pregnancy | BabyCenter**

Abstract. The American Diabetes Association (ADA) "Standards of Medical Care in Diabetes" includes ADA's current clinical practice recommendations and is intended to provide the components of diabetes care, general treatment goals and guidelines, and tools to evaluate quality of care.

## **9. Cardiovascular Disease and Risk Management: Standards**

Very small and very large babies have higher mortality and morbidity rates than infants of normal size [53]. Because early detection of growth abnormalities may help to prevent fetal demise and manage perinatal complications more appropriately, monitoring of fetal growth is an important part of antepartum care.

Introduction. The hypertensive disorders of pregnancy (HDP) remain leading causes of maternal and perinatal morbidity and mortality. This guideline summarizes the quality of the relevant existing evidence and provides a reasonable approach to the diagnosis, evaluation, and treatment of the HDP.

## **Diagnosis, evaluation, and management of the hypertensive**

Flu is more likely to cause severe illness in pregnant women than in women of reproductive age who are not pregnant. Changes in the immune system, heart, and lungs during pregnancy make pregnant women (and women up to two weeks postpartum) more prone to severe illness from flu, including illness resulting in hospitalization.

## **Flu Vaccine Safety and Pregnancy | CDC**

Associated terms for pregnancy are gravid and parous. Gravidus and gravid come from the Latin for "heavy" and a pregnant female is sometimes referred to as a gravida. Gravidity is a term used to describe the number of times that a female has been pregnant. Similarly, the term parity is used for the number of times that a female carries a pregnancy to a viable stage.

## **Pregnancy - Wikipedia**

\*Some experts recommend a cutoff of 130 mg/dL (7.2 mmol/L) because that identifies 90% of women with gestational diabetes, compared to 80% identified using the threshold of 140 mg/dL (7.8 mmol/L).

### **Glucose Tests | LabCorp**

Excessive alcohol consumption is a significant cause of hepatitis and is the most common cause of cirrhosis in the U.S. Alcoholic hepatitis is within the spectrum of alcoholic liver disease. This ranges in order of severity and reversibility from alcoholic steatosis (least severe, most reversible), alcoholic hepatitis, cirrhosis, and liver cancer (most severe, least reversible).

### **Hepatitis - Wikipedia**

Improving the U.S. health care system requires simultaneous pursuit of three aims: improving the experience of care, improving the health of populations, and reducing per capita costs of health care.
