What Do Plants Need to Grow?, a second through fourth grade unit, introduces students to the important role plants play in sustaining life as we know it. Plants are among the most important resources on Earth, providing us with food to eat and oxygen to breathe. In addition to adding beauty to our surrounding environment, plants also keep our

What Do Plants Need to Grow?

filled with liquid water, preventing the plant from "breathing," causing the plant to die. Too much water might also encourage the growth of harmful bacteria. So which option is worse? It's like choosing between dying of thirst and drowning. Two bad options! Some plants would definitely choose the "too little water" option.
