AP Chemistry Laboratory #17: Determination of Unknown Acid Concentration by Titration Lab days: Friday, March 9, and Monday, March 12, 2018 Lab due: Wed., March 14, 2018 Goals (list in your lab book): The goals of this lab are to (a) identify the key parts of an acid-base titration curve and (b) determine the molarity of an unknown acid using ...

AP Chemistry Laboratory #17: Determination of Unknown Acid

Name_____ AP Chemistry Acid-Base Titration Lab INTRODUCTION In this lab you will be titrating both a strong acid (HCl) and then a weak acid ($\text{HC}_2\text{H}_3\text{O}_2$) with a strong base NaOH while recording the pH. From the collected data a titration curve will be plotted for each acids and differences in the curves noted. ...

Name AP Chemistry Acid-Base Titration Lab

AP Chemistry Lab #2 " Inquiry Acid/Base Titrations This lab will not be written into your lab notebook, but will be placed into your chemistry binder as a guided inquiry lab. A general procedure for this titration is described below and will be outlined during our class discussion.

AP Chemistry Lab #2 " Inquiry Acid/Base Titrations

The titration in this lab took place between the strong acid HCl and the strong base, NaOH. In strong acid/strong base titrations, the equivalence point is found at a pH of 7.00. In titrations with a weak base and a strong acid, the pH will always be less than 7 at the equivalence point because the conjugate acid of the weak base lowers the pH.

Titration Lab - AP Chemistry

Compare and sketch a titration graph for a strong acid/strong base titration and for a weak acid/strong base titration. Graph at the bottom of the page. The strong acid/strong base drops to a lower pH unlike the weak acid/strong base titration.

AP CHEM TITRATION LAB

Titration was used in this lab to oxidize the Fe²⁺ to Fe³⁺ in the FAS, using potassium permanganate solution. It was then used to determine the concentration of Fe²⁺ in iron pills. The results supported the scientific concept of titration because the process was done right and carefully in order to get the closest results to 17% as possible.
