

biology chapter 2 the pdf

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Chemical biology is a scientific discipline spanning the fields of chemistry and biology. The discipline involves the application of chemical techniques, analysis, and often small molecules produced through synthetic chemistry, to the study and manipulation of biological systems. In contrast to biochemistry, which involves the study of the chemistry of biomolecules and regulation of biochemical ...

Chapter 1 Introduction. The dynamic process by which the single-cell human zygote (zygote) [1] becomes a 100 trillion (10¹⁴) cell adult [2] is perhaps the most remarkable phenomenon in all of nature.. Researchers now know that many of the routine functions performed by the adult body become established during pregnancy—often long before birth. [3]
