Biotechnical Engineering PLTW â€“Scope and Sequence â€“Year at

Introduction to Engineering Design. Students dig deep into the engineering design process, applying math, science, and engineering standards to hands-on projects. They work both individually and in teams to design solutions to a variety of problems using 3-D modeling software, and use an engineering notebook to document their work.

PLTW Engineering Curriculum | PLTW

Biotechnical Engineering. This course is typically the 3rd course a student will take in the PLTW sequence at New Trier. Students will take the basic engineering skills and knowledge they have acquired from their earlier courses and apply them to higher level and more complex problems, all focused in the biotechnical engineering field.

Project Lead The Way provides transformative learning experiences for PreK-12 students and teachers across the U.S. We create an engaging, hands-on classroom environment and empower students to develop in-demand knowledge and skills they need to thrive. We also provide teachers with the training, resources, and support they need to engage students in real-world learning.
