The mind-body problem is a philosophical problem concerning the relationship between thought and consciousness in the human mind and the brain as part of the physical body. It is distinct from the question of how mind and body function chemically and physiologically since that question presupposes an interactionist account of mind-body relations. ...

A series of wooden geometric puzzles, including some incorporating magnets, were offered by a company called Tensegrity Systems, located in Tivoli, NY, and founded in 1986 by Cary Kittner and Stuart Quimby. The company name was eventually changed to Design Science Toys Ltd.. You can see U.S. Patent 4731962 for their "Tensegritoy." It looks like they went out of business in 2005 - see here and here.

Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.
