This is a list of software used to simulate the material and energy balances of chemical processing plants.

List of chemical process simulators - Wikipedia

Historically, the chemical engineer has been primarily concerned with process engineering, which can generally be divided into two complementary areas: chemical reaction engineering and separation processes. The modern discipline of chemical engineering, however, encompasses much more than just process engineering.

This study reports an attempt to incorporate conformational information in MIA's QSAR to become it a three-dimensional method. The geometry optimization and alignment steps to generate 2D image projections from 3D chemical structures was successful, but the QSAR model obtained traditionally was better.
