Chemistry of Materials (ACS Publications)

This is a book about abiogenesis; how chemical auto-catalytic replicating molecules developed metabolism (energy gathering abilities) and complexification in it's continuing "drive" toward Dynamic Kinetic Stability, and gradually became what we today call biology.

Amazon.com: What Is Life?: How Chemistry Becomes Biology

Learn and research science, chemistry, biology, physics, math, astronomy, electronics, and much more. 101science.com is your scientific resource and internet science PORTAL to more than 20,000 science sites.

Specification GATEWAY SCIENCE CHEMISTRY A

Abiogenesis, or informally the origin of life, is the natural process by which life arises from non-living matter, such as simple organic compounds. The transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular self-replication, self-assembly, autocatalysis and cell membranes.

Abiogenesis - Wikipedia

Nuclear chemistry is the subfield of chemistry dealing with radioactivity, nuclear processes, such as nuclear transmutation, and nuclear properties.. It is the chemistry of radioactive elements such as the actinides, radium and radon together with the chemistry associated with equipment (such as nuclear reactors) which are designed to perform nuclear processes.
