Over the past decade this concept has been embraced by many disciplines outside economics; indeed the above quote is from Glynis Cousin's excellent short introduction to the concept written for earth scientists.

### **The Threshold Concept**

Formal concept analysis (FCA) is a principled way of deriving a concept hierarchy or formal ontology from a collection of objects and their properties. Each concept in the hierarchy represents the objects sharing some set of properties; and each sub-concept in the hierarchy represents a subset of the objects (as well as a superset of the properties) in the concepts above it.
