Earth Sciences Teaching Resources & Lesson Plans

How do greenhouse gases affect the climate? Explore the atmosphere during the ice age and today. What happens when you add clouds? Change the greenhouse gas concentration and see how the temperature changes. Then compare to the effect of glass panes. Zoom in and see how light interacts with molecules. Do all atmospheric gases contribute to the greenhouse effect?

The Greenhouse Effect - Greenhouse Effect | Greenhouse

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

Science 4-5 - SolPass

Packed with experiments and activities, this science unit explores weather and atmosphere in detail. The packet includes 121 pages and is designed to help children gain knowledge of meteorology as they recognize God's hand and feel the wonders of this world.

Science – Jenny Phillips

The Teaching Weather Packet is available here. Click here to see the Table of Contents. The Packet includes: Structure and composition of the atmosphere, heat transfer, atmospheric factors that influence weather and how meteorologists measure those factors, air pressure and fronts, clouds, weather observation and interpretation, and possible effects of human activity on the atmosphere.

Teaching Weather & Climate - Marcia's Science Teaching Ideas

Lynnanne, you will need a tech piece each day for this unit, we have a 1:1 laptop program and students bring them to class. You can have 2 students per computer or tablet or modify this unit so that you spend one day a week dedicated to their weather study instead of everyday for 4 weeks.

CBSE Class 7 Geography Worksheet (1) - Environment

Wind is the flow of gases on a large scale. On the surface of the Earth, wind consists of the bulk movement of air. In outer space, solar wind is the movement of gases or charged particles from the Sun through space, while planetary wind is the outgassing of light chemical elements from a planet's atmosphere into space. Winds are commonly classified by their spatial scale, their speed, the ...

There are some very good arguments for being skeptical of global warming predictions. But the proliferation of bad arguments is becoming almost dizzying.

Skeptical Arguments that Don't Hold Water - Roy Spencer

1. Introduction. Sunlight is the most abundant energy source available on earth, and therefore designing systems that can effectively gather, transfer, or store solar energy has been a great enduring interest for researchers.
