Physical science is an encompassing term for the branches of natural science and science that study non-living systems, in contrast to the life sciences.

### **Branches of science - Wikipedia**

Physics (from the Ancient Greek  $\varphi\upsilon\sigma\iota\kappa\acute{\eta}$ , physis meaning "nature") is the fundamental branch of science. The primary objects of study are matter and energy. Physics is, in one sense, the oldest and most basic academic pursuit; its discoveries find applications throughout the natural sciences, since matter and energy are the basic constituents of the natural world.

The name maglev is derived from magnetic levitation. Magnetic levitation is a highly advanced technology. It has various uses. The common point in all applications is the lack of contact and thus no wear and friction. This increases efficiency, reduces maintenance costs, and increases the useful life of the system. The magnetic levitation technology can be used as an efficient technology in ...
