A more fair and safe society, as well as better products and services, can be enabled if the data science industry makes a commitment to hiring and cultivating diverse talent.

InformationWeek, serving the information needs of the

In information security and programming, a buffer overflow, or buffer overrun, is an anomaly where a program, while writing data to a buffer, overruns the buffer's boundary and overwrites adjacent memory locations.. Buffers are areas of memory set aside to hold data, often while moving it from one section of a program to another, or between programs. Buffer overflows can often be triggered by ...
