Prevalence in epidemiology is the proportion of a particular population found to be affected by a medical condition (typically a disease or a risk factor such as smoking or seat-belt use). It is derived by comparing the number of people found to have the condition with the total number of people studied, and is usually expressed as a fraction, as a percentage, or as the number of cases per ...

CHAPTER I THE POISONED NEEDLE "Truth wears no mask, seeks neither place nor applause, bows to no human shrine; she only asks a hearing." The increasing flood of evidence against vaccination and the growing for the un-suppressed facts about this "touchy" subject have literally forced this book into being.

THE POISONED NEEDLE by Eleanor McBean

Learning Objectives By the end of this chapter you should appreciate that: n abnormal psychology (or psychopathology) deals with sets of behaviours or symptoms that produce a functional impairment in people's lives; n psychological disorders (e.g. schizophrenia) have been documented across time and culture; n throughout history, the causes of abnormal behaviour have been construed from a ...
