James K Nelson November 5, 2015 at 12:46 am. Good points. Regarding the performance issues, do you use ImmutableJS (or something similar) and shouldComponentUpdate in your components, to ensure youâ€™re only rendering Virtual DOM when your props have actually changed?. Regarding reducers being able to be actors â€™ this would undermine Reduxâ€™s stance on reducers being pure functions.

A taxonomy is a nothing more than a classification system that arranges elements within a field of science according to their relationships. As educational psychology progressed in the early 1900's, researchers sought to improve methods of teaching and learning by classifying the response and reaction to information and mapping intellectual functions.

In computer software, an application binary interface (ABI) is an interface between two binary program modules; often, one of these modules is a library or operating system facility, and the other is a program that is being run by a user.. An ABI defines how data structures or computational routines are accessed in machine code, which is a low-level, hardware-dependent format; in contrast, an ...

Statistics is the mathematical science involving the collection, analysis and interpretation of data. A number of specialties have evolved to apply statistical and methods to various disciplines. Certain topics have "statistical" in their name but relate to manipulations of probability distributions rather than to statistical analysis.
