

nervous system research paper pdf

CNS lymphoma consists of 2 major subtypes: secondary CNS involvement by systemic lymphoma and PCNSL. Contrast-enhanced MR imaging is the method of choice for detecting CNS lymphoma. In leptomeningeal CNS lymphoma, representing two-thirds of secondary CNS lymphomas, imaging typically shows leptomeningeal, subependymal, dural, or cranial nerve enhancement.

Central Nervous System Lymphoma: Characteristic Findings

Feature detection is a process by which the nervous system sorts or filters complex natural stimuli in order to extract behaviorally relevant cues that have a high probability of being associated with important objects or organisms in their environment, as opposed to irrelevant background or noise.. Feature detectors are individual neurons“or groups of neurons“in the brain which code for ...

Feature detection (nervous system) - Wikipedia

Lavender is traditionally alleged to have a variety of therapeutic and curative properties, ranging from inducing relaxation to treating parasitic infections, burns, insect bites, and spasm. There is growing evidence suggesting that lavender oil may be an effective medicament in treatment of several neurological disorders. Several animal and human investigations suggest anxiolytic, mood ...

Lavender and the Nervous System - Hindawi

The polyvagal construct was introduced to emphasize and document the neurophysiological and neuroanatomical distinction between two branches of the tenth cranial nerve (vagus) and to propose that each vagal branch was associated with a different adaptive behavioral strategy.

The polyvagal theory: phylogenetic substrates of a social

Technical Paper | November 2018 Next Generation Cyber Infrastructure Apex Program Publications DHS's Science and Technology Directorate's Next Generation Cyber Infrastructure Apex program seeks to harden critical systems and networks. MITRE“s Homeland Security Systems Engineering and Development Institute teamed up with DHS to support this effort.

Glial fibrillary acidic protein (GFAP) is the hallmark intermediate filament (IF; also known as nanofilament) protein in astrocytes, a main type of glial cells in the central nervous system (CNS).

Glial fibrillary acidic protein (GFAP) and the astrocyte

Cushing reflex (also referred to as the vasopressor response, the Cushing effect, the Cushing reaction, the Cushing phenomenon, the Cushing response, or Cushing's Law) is a physiological nervous system response to increased intracranial pressure (ICP) that results in Cushing's triad of increased blood pressure, irregular breathing, and bradycardia. It is usually seen in the terminal stages of ...

Note: Genes involved in ependymomas remain to be uncovered. Mutations or deletions of the tumor suppressor genes CDKN2 A et CDKN2 B and amplification of CDK4 or CCND1 have been reported.

Mutations of TP53 were occasionally observed in ependymomas.; Increased incidence of ependymomas in neurofibromatosis type 2 has suggest that NF2 represents an obvious candidate gene.

Nervous system: Ependymomas

Journal of Nervous and Mental Disease website feature showcases article ISI Citation Data. Some of the citation data features include: # Times Cited: Each article will display the total number of times it was cited.; Citing Articles: Each article will display a list of the articles that cited it with links where available. Every month new citing article data will be retrieved and displayed on ...

SAMS. Click here for the AANP's self-assessment modules. These modules are ideal for MOC and for CME work, providing an up to date overview of recent developments within neuropathology and including modules based on articles published in the JNEN and from the annual AANP Meeting.

Journal of Neuropathology & Experimental Neurology

Brain Research publishes papers reporting interdisciplinary investigations of nervous system structure and function that are of general interest to the international community of neuroscientists. As is evident from the journals name, its scope is broad, ranging from cellular and molecular studies through systems neuroscience, cognition and disease.

The hypothalamus is a small area of the brain that helps to stimulate key functions. For example, it helps to regulate temperature, weight, emotions, the sleep cycle, and the sex drive. This ...

Hypothalamus: Function, hormones, and disorders

Abstract. Although major research efforts have focused on how specific components of foodstuffs affect health, relatively little is known about a more fundamental aspect of diet, the frequency and circadian timing of meals, and potential benefits of intermittent periods with no or very low energy intakes.

Meal frequency and timing in health and disease | PNAS

This website provides easy access to all the pesticide-related information that is contained in various pesticide topical sites. It also includes news and meeting information, an A-Z index, and more.
