The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Topics include questionnaire design and survey sampling, forecasting techniques, computational tools and demonstrations.

N-back is a kind of mental training intended to expand your working memory (WM), and hopefully your intelligence (IQ 1).. The theory originally went that novel 2 cognitive processes tend to overlap and seem to go through one central bottleneck.As it happens, WM predicts and correlates with IQ 3 and may use the same neural networks 4, suggesting that WM might be IQ 5.
