Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Chemistry - Wikipedia

Chemistry is a natural science that studies the composition, structure, and properties of matter, as well as the changes it undergoes during chemical reactions. It is a central science because it bridges physics and biology. The discipline involves the study of atoms, molecules, and ions, and their interactions. Chemistry is a vast field with many sub-disciplines, including organic chemistry, inorganic chemistry, physical chemistry, and analytical chemistry.

In physical and organic chemistry, the dispersity is a measure of the heterogeneity of sizes of molecules or particles in a mixture. A collection of objects is called uniform if the objects have the same size, shape, or mass. A sample of objects that have an inconsistent size, shape and mass distribution is called non-uniform. The objects can be in any form of chemical dispersion, such as ...
