A number of significant scientific events occurred in 2014, including the first robotic landing on a comet and the first complete stem-cell-assisted recovery from paraplegia. The year also saw a significant expansion in the worldwide use and sophistication of technologies such as unmanned aerial vehicles and wearable electronics.. The United Nations declared 2014 the International Year of ...

Rutgers Physics News The 2018 Clarivate Analytics (formerly Thomson Reuters) list of highly-cited researchers was just released and we are delighted that, once again, two of our colleagues, Sang-Wook Cheong and Saurabh Jha, are included among this group. This distinction places them among the top 1% most cited for their subject field and year of publication, earning them the mark of exceptional ...

A perovskite solar cell based on ZnO nanorods was prepared, and its photovoltaic performance was investigated. ZnO nanorods were grown on the ZnO seed layer from solution, and their diameters and lengths were controlled by precursor concentration and growth time. CH<sub>3</sub>NH<sub>3</sub>PbI<sub>3</sub> perovskite infiltrated ZnO nanorods showed a power conversion efficiency of 11.13% with short-circuit current density J<sub>sc</sub> ...

We show, via a massive ( N = 689,003) experiment on Facebook, that emotional states can be transferred to others via emotional contagion, leading people to experience the same emotions without their awareness. We provide experimental evidence that emotional contagion occurs without direct interaction between people (exposure to a friend expressing an emotion is sufficient), and in the complete ...

The nature of consciousness, the mechanism by which it occurs in the brain, and its ultimate place in the universe are unknown. We proposed in the mid 1990's that consciousness depends on biologically "orchestrated" coherent quantum processes in collections of microtubules within brain neurons, that these quantum processes correlate with, and regulate, neuronal synaptic and membrane ...

Nikola Tesla said it best, “the day science begins to study non-physical phenomena, it will make more progress in one decade than in all the previous centuries of its existence. To understand the true nature of the universe, one must think it terms of energy, frequency and vibration.” • Swami Vivekananda influenced Tesla’s work, an Indian [!]
