Critical thinking in Nursing: Decision-making and Problem

A problem statement is a concise description of an issue to be addressed or a condition to be improved upon. It identifies the gap between the current (problem) state and desired (goal) state of a process or product. Focusing on the facts, the problem statement should be designed to address the 5 W's - who, what, where, when, and why. The first condition of solving a problem is ...

A Solution I start with the fundamental belief that the true solution to this problem will be elegant: you know you have gotten it right when your solution is clean, unambiguous and (borrowing a cliché from the discoverers of the structure of the

How to Categorize Operational Losses? - OpRisk Advisory

In economics, a public good is a good that is both non-excludable and non-rivalrous in that individuals cannot be effectively excluded from use and where use by one individual does not reduce availability to others.. Gravelle and Rees: "The defining characteristic of a public good is that consumption of it by one individual does not actually or potentially reduce the amount available to be ...

For more practical detail the behavior you wish to continue indefinitely must be defined. For example: Environmental sustainability is the ability to maintain rates of renewable resource harvest, pollution creation, and non-renewable resource depletion that can be continued indefinitely.. Economic sustainability is the ability to support a defined level of economic production indefinitely.

Definition of Sustainability - thwink.org

This is the Catch 22 about wicked problems “ you cannot learn about the problem without trying solutions, but every solution you try is expensive and has lasting unintended consequences that may spawn new wicked problems.
