We've created Paleo Autoimmune Protocol print-out guides to provide a quick reference. You can post them on your fridge, take them with you when you shop or send to friends and family.

Paleo Autoimmune Protocol Print-Out Guides | What to Eat

Polymerase chain reaction, or PCR, is a technique for making many copies of a specific DNA sequence. DNA is repeatedly heated and cooled in the presence of primers that bracket the desired sequence and of the enzyme Taq polymerase.

In nuclear physics and nuclear chemistry, nuclear fission is either a nuclear reaction or a radioactive decay process in which the nucleus of an atom splits into smaller parts (lighter nuclei). The fission process often produces free neutrons and gamma photons, and releases a very large amount of energy even by the energetic standards of radioactive decay. ...

Thrust is a reaction force described quantitatively by Newton's third law. When a system expels or accelerates mass in one direction, the accelerated mass will cause a force of equal magnitude but opposite direction on that system. The force applied on a surface in a direction perpendicular or normal to the surface is also called thrust. Force, and thus thrust, is measured using the ...

Thrust - Wikipedia

Allergies are hypersensitivities, overreactions of the immune system to substances that do not cause reactions in most people. The substances that trigger the overreaction are called allergens.. According to the American Academy of Allergy, Asthma and Immunology (AAAAI), the percentage of people worldwide who suffer from some sort of allergy has risen steadily for the last 50 years with almost ...

Measuring the rate of a chemical reaction is a key technique in chemistry, and gives insights into how the reaction is occurring. Rates of reaction can be measured in a variety of ways such as by measuring the volume of gaseous products, changes in reaction masses, changes in colour and changes in pH.
