RESEARCH DESIGN AND METHODS We searched the MEDLINE database up to May 2010 for prospective cohort studies of SSB intake and risk of metabolic syndrome and type 2 diabetes. We identified 11 studies (three for metabolic syndrome and eight for type 2 diabetes) for inclusion in a random-effects meta-analysis comparing SSB intake in the highest to lowest quantiles in relation to risk of metabolic ...

Reprogramming of endogenous mouse alpha cells into functional beta cells, which significantly delays diabetes onset in autoimmune diabetic mice, and the successful reprogramming of human alpha cells into beta cells with the same strategy represent a promising way for treating type 1 diabetes.

Endogenous Reprogramming of Alpha Cells into Beta Cells

Abstract. This paper documents a marked increase in the all-cause mortality of middle-aged white non-Hispanic men and women in the United States between 1999 and 2013.

Rising morbidity and mortality in midlife among white non

Abstract. Although major research efforts have focused on how specific components of foodstuffs affect health, relatively little is known about a more fundamental aspect of diet, the frequency and circadian timing of meals, and potential benefits of intermittent periods with no or very low energy intakes.

Meal frequency and timing in health and disease | PNAS

Health literacy is the degree to which individuals have the capacity to obtain, process, and understand basic health information and services needed to make appropriate health decisions.
