Sample APA Research Paper - Write Source

In probability theory and statistics, variance is the expectation of the squared deviation of a random variable from its mean. Informally, it measures how far a set of (random) numbers are spread out from their average value. Variance has a central role in statistics, where some ideas that use it include descriptive statistics, statistical inference, hypothesis testing, goodness of fit, and ...

Variance - Wikipedia

In analytical chemistry, a calibration curve, also known as a standard curve, is a general method for determining the concentration of a substance in an unknown sample by comparing the unknown to a set of standard samples of known concentration. A calibration curve is one approach to the problem of instrument calibration; other standard approaches may mix the standard into the unknown, giving ...

Biotage microwave reaction vials are durable and produce safe reactions at all times. Our high precision microwave vials are designed and tested to withstand pressures beyond 30 bar in a wide range of conditions.

Biotage - Microwave Reaction Vials

Polymerase chain reaction (PCR) is a way to make many copies of a sequence of DNA (this is sometimes called 'amplifying' the DNA). It is done in a lab, using an enzyme called DNA polymerase. It is called chain reaction because the result of one cycle is used immediately for the next cycle. This allows exponential growth to happen.. PCR has many uses in a biological or biochemical setting.
