Aggregation! An Olap cube is a prebuilt cube of data that has been aggregated according to pre-determined dimensions whereas a universe is a semantic layer over a set of joined tables that generates sql and aggregation on the fly depending what the user selects.

Difference between OLAP cube and Universe

The repository information is stored in the form of InfoObject and the CMS reads the InfoObjects from the virtual tables. Below are the BusinessObjects metadata virtual tables and their associated objects.

BusinessObjects Query builder – Basics | SAP Blogs

The ability to publish and schedule reports according to one's profile is an important feature that we have in Business Objects. For example, if I am a plant manager for a the West Region and want to receive a daily report on work quality, it would be very beneficial if I can receive a report in my inbox daily that only contains results for the West Region.

Step by Step guide on how to Burst Reports in Business

Single sign-on (SSO) is an important feature that I highly recommend all organizations to setup in their SAP BusinessObjects implementations. It allows users to move between services securely and uninterrupted without specifying their credentials each time.

Setting up SAP BusinessObjects single sign-on based on
