Michael D. writes... A source fed optically into a playbar or analog into a Connect is in sync across multiple zones. According to Sonos there is a 70ms propagation delay, however since the playbar uses the distribution system and doesn't play directly from the input the delay is equal for all speakers.

My 32LH2000 shipped with firmware version 3.12 and after some heavy googling, I found v.3.15 on an LG page. I thought others might be interested to know about this too... The only change I made was to convert the instructions to PDF from the original PowerPoint file. The instructions are attached and the firmware file can be downloaded from the LG software page, or from my Dropbox: v3.15.00_EU ...
