Lesley, Pre-MBA candidate, Summer 2010 This was my first online class, so I really had no clue what to expect. To say I was happily surprised is an understatement. I have never been a strong student when it comes to math, and this class was so clear and easy to follow that I felt I understood the concepts exceptionally well.

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

The derivative of a function of a real variable measures the sensitivity to change of the function value (output value) with respect to a change in its argument (input value). Derivatives are a fundamental tool of calculus. For example, the derivative of the position of a moving object with respect to time is the object's velocity: this measures how quickly the position of the object changes ...
