System analysis and design focus on systems, processes and technology. 1.2 Over View of System Analysis and Design Systems development can generally be thought of as having two major components: Systems analysis and Systems design. System design is the process of planning a new business system or one to replace or complement an existing system.

Lesson No: 1 Lesson Name : Overview of System Analysis

1 INTRODUCTION TO SYSTEM ANALYSIS AND DESIGN 1.1 INTRODUCTION Systems are created to solve problems. One can think of the systems approach as an organized way of dealing with a problem.

organization. Thus, system analysis and design is a process that is used to analyze, design, and implement improvements in the functioning of business that can be accomplished through the use of computerized information systems. System analysis and design uses a methodological approach to develop a computer-based information system.
