Background. Many approaches have been considered to reduce heart failure (HF) readmissions. The Joint Commission on Accreditation of Health Care Organizations (JC) requires hospitals to provide patients admitted for HF with discharge instructions that address 6 topics related to HF management: diet, exercise, weight monitoring, worsening symptoms, medications, and follow-up appointments.

The heart is a muscular organ in most animals, which pumps blood through the blood vessels of the circulatory system. Blood provides the body with oxygen and nutrients, as well as assists in the removal of metabolic wastes. In humans, the heart is located between the lungs, in the middle compartment of the chest.. In humans, other mammals, and birds, the heart is divided into four chambers ...

Metanoia, a transliteration of the Greek  $\mu\epsilon\tau\alpha\sigma\upsilon\lambda\iota\sigma\mu\acute{o}\varsigma$ , is "a transformative change of heart; especially: a spiritual conversion." The term suggests repudiation, change of mind, repentance, and atonement; but "conversion" and "reformation" may best approximate its connotation. In The King James Version of the Bible, its verbal cognate  $\mu\epsilon\tau\alpha\sigma\upsilon\lambda\iota\sigma\mu\acute{o}\varsigma$  is translated as repent.
