Somatic experiencing is a form of alternative therapy aimed at relieving the symptoms of post-traumatic stress disorder (PTSD) and other mental and physical trauma-related health problems by focusing on the client's perceived body sensations (or somatic experiences). It was created by trauma therapist Peter A. Levine. Sessions are normally done in person, and involve a client tracking his or ...

How do we deal with trauma? We all encounter trauma of one kind or another, but we are generally adept at coping with our mini-traumas. The real challenge is learning how to address and heal from the truly traumatic experiences in life: sexual assault, witnessing extreme violence, living with domestic violence, combat experiences, etc.

A book for clinicians and clients to use together that explains key concepts of body psychotherapy. The body's intelligence is largely an untapped resource in psychotherapy, yet the story told by the "somatic narrative" -- gesture, posture, prosody, facial expressions, eye gaze, and movement -- is arguably more significant than the story told by the words.

Concussion, also known as mild traumatic brain injury (mTBI), is typically defined as a head injury that temporarily affects brain functioning. Symptoms may include headaches, trouble with thinking, memory or concentration, nausea, blurry vision, sleep disturbances or mood changes. Some symptoms may begin immediately, while others may appear days after the injury.
