

vocabulary geometry answers pdf

Unit 3 Vocabulary! Geometry Vocabulary Reference Sheet Term Picture Definition/Description ray a part of a line that begins at a particular point (the endpoint) and extends forever

Geometry Vocabulary Reference Sheet copy

Virginia Department of Education ©2013 Geometry Vocabulary Cards Page 18 Law of Detachment deductive reasoning stating that if the hypothesis of a true conditional statement is true then the conclusion is also true Example: If $m \angle A > 90^\circ$, then $\angle A$ is an obtuse angle. $m \angle A = 120$. Therefore, $\angle A$ is an obtuse angle.

Basic Geometry Definitions - Matching Worksheet Write the letter of the answer that matches the problem.
_____ 1. Which lines intersect PO? a. PO _____ 2. Which line is parallel to MN? b. USY, VSY, GRA, KRA
_____ 3. Which lines are perpendicular to each other? c. MN _____ 4. Identify four right angles. d. UV & XY, GK & AB _____ 5.

Basic Geometry Definitions Matching Worksheet

3. The third basic figure in geometry is called a _____. a. Explanation: a flat surface with no thickness that extends forever in all directions. How we _____ a plane. How planes work (extend forever). b. Naming "Option 1: The word "Plane" followed by any _____ points in the plane.

Geometry Vocabulary/Definitions Flashcards | Quizlet

Batch 50592266 Basic Geometry Terms Version 2 Match the name to the definition, symbol and drawing. (1) Plane (2) Ray (3) Line (4) Point (5) Segment (A) Part of a line (also the shortest path) between two points. (B) A flat surface with no thickness. (C) Extends forever along a given direction but has no width. (D) Has a location but no size or shape.

Geometry Vocabulary Quiz _____ 1. Trapezoid A. A quadrilateral with exactly 1 pair . of parallel sides
_____ 2. Parallelogram B. A quadrilateral with 4 congruent sides _____ 3. Square C. A quadrilateral with both pairs of opposite sides parallel _____ 4. Rhombus D. A quadrilateral with 4 right angles and 4 . congruent sides _____ 5. Rectangle E.

Geometry Vocabulary Quiz - CEENBoT / TekBot Site

CIRCLES Terms and Vocabulary: 1. Circle: The set of all points in a plane that are equidistant from a fixed point called the center. 2. Radius: A segment whose endpoints are the center of a circle and a point on the circle. (Note: All radii of the same circle are congruent). 3. Chord: A segment whose endpoints are 2 points on a circle. 4.

CIRCLES Terms and Vocabulary: center.

Postulate- a statement that describes a fundamental relationship between basic terms of geometry. Postulates are accepted as true without proof. Theorems are a statement or conjecture that can be proven true by given, definitions, postulates, or already proven theorems.

100 Word Vocabulary List Geometry

Many possible answers: $2x + 1$ or $y = x$ (any line with slope = $\frac{1}{2}$) 5. a. Write the equation for the following line: b. Write the equation for any line perpendicular to the line from part a. $y = -3x + 2$ (or any line with slope = $-\frac{1}{3}$) 6. a. Write the equation for the following line: b.

Name: Geometry, Final Review Packet I. Vocabulary Word

An angle that has a measure of 180 The common endpoint of the two rays that form an angle Words that do not have formal definitions, but there is agreement about what they mean In geometry, the words point, line, and plane are undefined terms. Two angles whose sides form two pairs of opposite rays 3 and 6 are vertical angles.
