Water pollution from agriculture: a global review

Water pollution is a major environmental issue in India. The largest source of water pollution in India is untreated sewage. Other sources of pollution include agricultural runoff and unregulated small scale industry. Most rivers, lakes and surface water in India are polluted.

Water pollution in India - Wikipedia

Water pollution in New Zealand is an increasing concern for those who use and care for waterways and New Zealand regulatory bodies. An increase in population is linked to an increase in water pollution, due to a range of causes such as rural land use, industrial use and urban development. Fresh water quality is under pressure from agriculture, hydropower, urban development, pest invasions and ...

Water pollution in New Zealand - Wikipedia

Nutrient pollution is one of America's most widespread, costly and challenging environmental problems, and is caused by excess nitrogen and phosphorus in the air and water.

Nutrient Pollution | US EPA

Factory Farm Pollution In today's world there are a host of serious environmental problems, and factory farming is one of the top causes of pollution. [1] Scientific research has found that factory farming's method of crowding and confining animals in warehouse-like conditions before killing them and mass-producing both "meat" from cows, pigs and chickens as well as dairy and eggs ...
